Executive Summary

This deliverable describes the results and impact of the implementation of the STREAM-OD pilot on the FERSA production line. The current status of FERSA's production line as a consequence of the implementation of STREAM-OD is widely described by means of data from the demo manufacturing, a summary of the improvements achieved, and three different videos showing the current status.

Finally, with the aim of showing the impact of the project on the FERSA line, the updated business case after the implementation of STREAM-OD is shown and analysed. The resulting figures clearly show a very positive impact.
